

BIO-MARINE

MADMAC-MS™

MATURATION **S**TIMULATOR AND BROODSTOCK CONDITIONER

“Tired of preparing fresh diets for conditioning or maturation of broodstock?”

No more storage problems.

No more hassles in daily preparation.

No more nightmares sourcing bloodworms, clams, crab, squid or Artemia biomass.

No more nightmares sourcing bloodworms, clams, crab, squid or Artemia biomass.

No more oxidation of essential fatty acids while in long term freezer storage.

No more transmission of disease from fresh food sources.

- Make your maturation diets **FRESH** and **ON-SITE** in **ONE-STEP**.
- Soft-fresh worms set up ready to feed in minutes.
- Remains stable and intact for over 8 hours, even during consumption.
- Simply add water, mix and extrude with our hand-held applicator.
- Dry, premix in powder form - 3 Kg, vacuum foil bag or 10 Kg bucket.
- Shelf life: Minimum 9 months when kept in cool, dry conditions.

MadMac-MS is a new soft-fresh diet containing high levels of DHA and DPA, essential for maturation stimulation and conditioning of broodstock kept in captivity.

This product contains **ALGAMAC-2000** to attain the highest levels of DHA.
