

# ACCESSORIES

## INLET FILTERS

These filters are designed to protect the Fuji Ring Compressor by filtering the inlet air when the blower is being used for pressure applications. The filter has a perforated metal outer cover and an inner liner wrapped with a fine (.009) mesh screen. The filter is rated for 200 micron filtration.

## INLET FILTER COVERS

These covers are designed to fit over the inlet filter in order to provide better filter protection. They are made of 100% polyester fibers, are approximately 3/4" thick, and are rated 80% efficient at 25 microns.
